OUR STAFF

Our staff consists of professionally trained Registered Nurses and Home Health Aides that are familiar with the symptoms and unique challenges of Parkinson's Disease, and recognize the ongoing need for medication and symptoms management for Parkinson's patients.

Each of our Registered Nurses and Home Health Aides have been trained and educated by the Struthers Parkinson's Center, a nationally recognized center of excellence that offers an integrated approach to caring for those with Parkinson's Disease.

Our ongoing collaboration with Struthers offers a wonderful opportunity to develop a unique residence that addresses the overall wellness and quality of life for each resident.

To achieve this balance, we utilize many programs that are offered at the Struthers Parkinson's Center for many of our residents in our Parkinson's Specialty Care residences.

Our staff is also required to attend continued training and education courses specific to Parkinson's Disease.

OUR SERVICES

Each of our residents have unique needs and are at different stages of their disease. We believe that socialization, medical care management and knowledge are key components in providing quality care for our residents.
